NEW TOLL SYSTEM IN CZ

From 1 December 2019, new electronic toll devices only

The toll collection technology for vehicles over 3.5 tonnes is changing from 1 December 2019. Get the new on-board unit in time and ensure a smooth transition to the new system.

In this information bulletin, we bring you an overview of the most important points.

More information

www.mytocz.eu
+420 243 243 243

REGISTRATION FOR ACQUIRING THE NEW ON-BOARD UNIT:

- on-line through the Customer Zone or at your closest Point of Sale
- the online registration procedure and the list of Points of Sale can be found at www.mytocz.eu

WHAT WILL HAPPEN AFTER THE REGISTRATION

After successful registration, you will receive an electronic device (on-board unit) as a vehicle operator and install it in a vehicle over 3.5 tonnes so that it is operational by 1 December 2019 at the latest. Although you are obliged to use the electronic device of the existing system operator in your vehicles until this date, there is no risk of being charged twice.

The new on-board unit will only start charging tolls as of 1 December 2019.

HOW TO OBTAIN THE NEW ON-BOARD UNIT

The OBU is the property of the state. After providing a deposit of CZK 2,468, we will lend it to you directly at a Point of Sale. In case of on-line registration by 30 November 2019, we will deliver the on-board unit free of charge to an address in the Czech Republic or any neighbouring country. In case of later registration, we only deliver free of charge within the Czech Republic. You can also obtain the unit from your fleet card issuer.

If you need to use the electronic device already from 1 December 2019, please allow for a longer delivery time by post, which can be up to 2 weeks under heavy load.

IMPORTANT DATES:

- you can register in the new system already from 22 September 2019
- after receiving the on-board unit, you must install it by 1 December 2019 at the latest
- you are also obliged to use the electronic device of the existing system operator in your vehicles until 1 December 2019

COURTESY TRANSLATION

Dear Minister,

The electronic toll system for vehicles with maximum permissible weight over 3.5 tons is currently being replaced in the Czech Republic. The new satellite toll system (which will replace Kapsch's current microwave technology) will be launched as of 1 December 2019.

In addition to financial savings, the new toll system will also provide the Czech Republic with an important opportunity to better manage its investments in transport infrastructure – also enabling hauliers from your country to travel quickly, safely and without unnecessary complications. However, the system's successful implementation necessitates hauliers' cooperation by registering for the new toll system and then replacing existing on-board units for new ones as at 1 December 2019. We are informing hauliers of this obligation through a targeted campaign in the Czech Republic and other countries.

Concerning the approaching launch of the toll system and Lithuanian hauliers' current inadequate activity in registering therefor, I would like to ask you to help inform Lithuanian drivers of their obligation in the Czech Republic. Through media impact, we would like to prevent problems and downtime at the state border, as well as at Points of Sale that issue on-board units.

According to current statistics, Lithuanian hauliers have approximately 16,000 Czech on-board units installed in their vehicles. Yet only 2,000 vehicle owners have so far registered for the new toll system within four weeks of the registration.

As part of the information campaign to launch the new toll system, in the first month of the registration period we have phoned each haulier that operates more than 10 lorries, we have distributed 230,000 information materials, and we have sent 110,000 information letters by post and 60,000 by e-mail. We are disseminating the necessary registration information with the help of industry organisations, and more than seven million Internet users have seen haulier-targeted online advertising.

Dear Minister, I would like to ask for your help in ensuring smooth transit traffic. As such, it would be very helpful if the Ministry under your control spread information through various communication channels about the obligation to register. For this purpose, I am also sending to you an information bulletin about adjustments to the Czech toll system and a press release containing general statistics and instructions for quick registration.

I would be very grateful for your cooperation and assistance in informing Lithuanian drivers about the introduction of the new toll system in the Czech Republic.

Respectfully,
